EDUCATION

Graphic Era University

B.Tech in Computer Science & Engineering | GPA: 8.53 / 10.0

Dehradun, Uttarakhand

Aug 2023 – Jul 2027

TECHNICAL SKILLS

Languages: TypeScript, Python, Java, C++

Backend: Node.js, Express.js, FastAPI, Spring Boot

Frontend & Mobile: React, Next.js

Cloud & DevOps: AWS (EC2, CloudFront), Docker

Databases: PostgreSQL, MongoDB, SQLite3

AI / ML & Automation: GenAI, RAG Pipelines, MCP

EXPERIENCE

Technology Business Incubator – Graphic Era University (TBI-GEU)

Dehradun, Uttarakhand

AI-Assisted Full Stack Web Development Intern

Jun 2026 – Present

- Developing **HimDraftAI**, an AI-assisted web app that generates SEO-optimized e-commerce product descriptions for Himalayan food producers.
- With AI Integration to generate context-aware, long-form product descriptions across various tones.
- A platform to help small and rural Himalayan food producers who cannot afford professional copywriting services create high-quality, market-ready product descriptions at a fraction of the cost.

PROJECTS

SQL-Assist | *Python, FastAPI, React.js, Gemini*

- Built an AI-powered NL2SQL tool that converts natural language queries into optimized SQL.
- Built FastAPI backend in Python with schema-aware SQL generation.
- Enabled secure, authenticated (JWT) live query execution directly against user-connected PostgreSQL and MySQL databases.
- Schema aware query generation to ensure most efficient query is generated based on database design.
- Helps non-technical users easily access required data.

DesignBoard | *TypeScript, NextJS, Node, Gemini*

- An AI powered platform for practicing system design interviews with an interactive whiteboard and real-time interview session.
- A "Leetcode for system design" experience with structured problem set.
- Used Gemini voice models and Assembly AI for text-to-speech for providing a real world interview experience.
- Developed a context aware an interview engine that ask follow-up questions, evaluate response, and generate personalized feedback and improvement suggestions.

LinkedIn Job Applier | *TypeScript, Python, Gemini, JWT, Chrome Extension APIs*

- Automated LinkedIn Easy Apply using a Chrome extension, eliminating repetitive manual steps.
- Used Gemini API for smart, context-aware form-filling with DOM parsing across handles multi-step forms, and file uploads without manual intervention.
- Secured the backend using JWT authentication.

CruzLink – AI IoT Smart Helmet | *TypeScript, ESP8266, Gemini, Twilio, MCP*

- An AI IoT smart helmet that detects crashes live with ESP8266 + gyroscope. Sends SOS automatically via Twilio API within seconds of crash detection.
- With a **voice-controlled AI assistant** backed by an **MCP server** for hands-free task execution, reducing distraction-based interactions while riding.
- Integrated GPS location sharing with automatic emergency-contact notification, reducing emergency response lag for accident scenarios in real time.

ACHIEVEMENTS & CERTIFICATIONS

HackerRank Orchestrate (Ranked 235th): Built a multi-agent GenAI triage system with hybrid RAG, 24-hour deadline.

Hack-o-Holic 3.0: Top 10 out of 100 teams at the Graphic Era Hill University hackathon.

AWS Cloud Practitioner Essentials: AWS Skill Builder .

MongoDB Node.js Developer Path: MongoDB University.

Anthropic: Claude 101 & Model Context Protocol (MCP): Advanced Topics.

Open Source: Merged bug fix contribution to ShadCN UI (GitHub).

LeetCode: Solved **300+ problems**.
